

About me

I've been designing and developing web projects for over 5 years, creating anything from small tailored landing pages to full website builds. My interest in the web and how it works drives me to learn, and stay up-to-date with the latest technologies. I enjoy writing clean, semantic markup; keeping my code less cluttered and easy to read.

Experience

GMG Digital, December 2019 to March 2020 - Contract Web Developer

At GMG, I was employed to work as part of a small team of developers to complete a couple of projects with a tight deadline. Using technologies such as Gatsby, React and Custom REST APIs allowed me to deliver projects on-time and on budget.

Utility Creative, October 2019 to December 2019 - Contract Web Developer

At Utility Creative I was employed on a short term contract to complete a small website build for The Police Association Victoria. Working as the sole developer on the project I was able to liaise with the project stakeholders to create a website using their preferred technology stack - TWIG and Firebase.

JLL (Bewonder*), July 2017 to Present - Web Developer

At JLL, I am responsible for everything digital within the agency. Working as part of a small team, I help to maintain, develop and deliver over 100 websites. My duties included the following:

- Maintenance of over 100 websites
- Wireframing, prototyping and development of anything from small microsites or games to full scale website builds
- Involvement in forming digital strategies through the analysis of data from platforms such as Google Analytics/AWStats
- Ensuring projects are delivered on-time, on budget and to a high standard
- Implementing SSL across our portfolio of websites

Egton Digital (EMIS), October 2013 to July 2017 - Support Developer/Delivery Lead

During my time at Egton Digital I worked as part of a development team which adopted the Agile methodology. Managing a portfolio of over 150 websites for Doctor's Surgeries all over the UK I was involved in making changes to custom WordPress themes and plugins.

I was also granted additional responsibility which involved managing, organising, and aiding the development of the apprentice's within the team.
